## Profile

   I am a recent graduate with a Bachelor's degree in Information Technology, actively seeking a challenging position as a Full Stack Developer. I bring expertise in both front-end and back-end technologies, aspiring to contribute to the development of innovative and scalable web applications. With a strong aptitude for problem-solving and a deep passion for continuous learning, I am eager to make significant contributions to a dynamic development team.

## Work Experience

**April 2023 - June 2023**
**Toyota Material Handling Warehouse Solution**
### Intern / Programmer

- Ticketing System Development: Architect and develop a ticketing website for issue reporting, including tracking problem status and resolutions.Integrate a messaging feature for user communication
- Web-Based API Documentation: Create comprehensive API guides, ensuring clarity, accessibility, and accuracy for seamless integration by developers. Collaborate with stakeholders to align with company standards.
- Server Room Inspection and Maintenance: Conduct regular server room checks, identifying and addressing issues related to performance, security, and environmental conditions.

## Soft Skill

**Time Management**
- I effectively prioritize tasks and allocate time to ensure deadlines are met

**Resourcefulness**
- I have a knack for finding solutions and making the most out of available resources

**Problem Solving**
- I excel at analyzing complex issues, breaking them down into manageable parts, and devising effective solutions.

**Stress Management**
- I remain calm and focused under pressure, handling stressful situations with a positive attitude.

## Certificate

**Feb 2024| The Asia Undergraduate Conference On Computing**
Received an award for presenting a research article as a poster. Good level (GOOD)

**Oct 2023 | Career for the Future Academy**
Information Technology Professionals Examination (ITPE)
